ABSTRACT

The purpose of this paper is to discuss the significance of effective communication in organizations. Corporate web is extremely useful for communication and collaboration between the employees for successful functioning of any business organization. Using this tool helps in conveying an individual work environment. Organisations now explore workplace strategies to enhance collaborative space for employees and organisation to connect firmly. This tool consists of features such as discussion forums, chat boxes, analytical approach, dashboards, blogs, project discussion, employee’s profile. This provides an intra-corporate efficient environment for the workers. This results in easy task allocation to the workers, communication and sound relationship between the employees and top level management.

II. Organisational Communication

Organisational communication is defined as transmitting related information and data about the task from the association to employees for interactive communication. Organizational communication is mainly based on the construction of a community within the work place to associate the task management and achievement status. Projects play a major role in the task activities on both the current and completed project discussion phase, where these strategies can be discussed on daily basis on chats and forums. Therefore this is the key mechanism for achieving coordination and development of the specified activities at distinct levels in the organisation. Organizational communication aims at linking related tasks, work units and divisions in the workplace. Also increases with task specialization and diversity in organizational structure.

III. Features
Job insecurity can be reduced and a way of efficient community space should be created so that employees feel their responsibility to the workplace. These features help in the way to execute their ideas of how the project can be delivered, posting queries, motivating their performance, compatibility among team leaders and members.

A. Forum
This discussion forum can bring together management and employees and allow for an open discussion on any topics and clarifications. Forums are also effective in archiving organisational communication to be used by the workers. It also facilitate in knowledge sharing. This will enable in posting queries related to workplace.

B. Intranet
An intranet is a private network that can be accessed by any authorised users within an organisation. It is mainly used for internal communication and collaboration. This result in a more flexible workforce and ensure all employees are working towards their comfort zone.

C. Dashboard
Dashboard is a visual display of the most important information needed to define one or more objectives. It consists of company details. A detailed comparison of the income each year as data automatically updated.

D. Blog
Blog is a place where employees can share their ideas, opinions, thoughts fast and in an informal way. It helps in broadcasting and highlighting an employee’s knowledge about a certain topic in organisation. It can also be frequently updated for general public interaction among the organisation.

E. Chat box
Chat box is a powerful tool where we can create a large platform for effective and friendly communication between every employee. It is the perfect tool for hosting online communication and coordinating teamwork. It is the most reliable messaging system.

F. Project Discussion
Project discussion allows user to quickly poll their friends on different project environment. Here this tool provide the details about the existing and also the current projects on going in the organisation, workers can also refer the details of the projects done.
