INTRODUCTION

Handloom saree are a traditional textile art of Bangladesh and India. The production of handloom sarees is important for economic development in rural India. Completion of a single saree takes two to three days of work. Several regions have their own traditions of handloom sarees. Thirubuvanam is an ancient temple town associated with the making of aesthetic silk sarees, traditionally weighing around 450-1250gm. The silk weight around 400gm and the rest of the weight is constituted by the zari. Conventionally, these silk sarees would measure about 12ft length and 4ft in breadth. In practice, it takes almost 15days to complete the creation of a saree, with finesses.

REVIEW OF LITERATURE

Working capital management

Sarwat B. P. and Agrawal R. S. (2004) have tried to evaluate working capital position of Nepal cement industry. To evaluate the financial performance To examine the profitability trend To ascertain the assets utilization pattern and evaluate liquidity position of the company.

The study attributes the losses or low level of profits of the public enterprises in Nepal to ineffective and inefficient utilization of working capital. The failure of an enterprise is due to shortage of working capital.
